(Left to right) Bird-X representative Jeremy Garrity and one of his company's menacing, life-sized 3D-Coyote decoys, with *Maintenance Technology's* Jane Alexander and Tom Madding, at a recent Grainger event in Schaumburg, IL.

Bird-X has been producing humane pest and bird deterrents for 45 years. Established in 1964, its first product was an ultrasonic repellent engineered to affect pest birds using audio signals undetectable to human ears. Since that time, the company has continued to develop unique and effective products and now offers a full arsenal of bird repelling devices and other pest and critter deterrents. In fact, according to company literature, today Bird-X offers the most comprehensive line of eco-friendly (i.e. "green"), environmentally safe, non-toxic and non-harmful pest and bird-control products available. They range from state-of-the-art laser technology to ultrasonic/sonic bird control, goose and pigeon repellents, bird spikes, bird netting, animal sound repellers and taste aversion gels and solutions.

Bird XPeller

Bird-X deterrents are the result of decades of scientific study and field testing. These products fall into four basic categories:

- **Physical Barriers:** Bird Spikes, Sticky Gels, Bird Netting

Gator Guard

- **Sound Repellers:** Bird XPeller, Critter Blaster, Goose Buster
- **Ultrasonic Sound Deterrents:** QuadBlaster QB 4, Ultrason X
- **Taste Aversions:** Bird Repellent Sprays, Bird Repellent Solutions
-
