A lot goes into being on the cutting edge of something. Here's how a leading machine-tool manufacturer got there and stays there.

Since its founding in 1983, Haas Automation, Inc. has grown into one of the largest machine-tool builders in the world, producing industry-leading products at consistently affordable prices. With its 30th anniversary on the horizon, the Oxnard, CA-based company's commitment to innovation and proactive equipment maintenance remain essential core values. To learn more about the company's recent accomplishments and the keys to its ongoing success, *Maintenance Technology* caught up with Haas veteran, Thomas Velasquez, Manager, Rotary Products Engineering.
