Azima DLI is the leader and premier provider of predictive maintenance analytical services and products that align with customers' high standards for reliability, availability and uptime.

Azima DLI's WATCHMAN™ Reliability Services utilize flexible deployment models, proven diagnostic software and unmatched analytical expertise to deliver sustainable, scalable and cost-effective condition-based maintenance programs. The company's offerings enable customers to implement comprehensive, predictive maintenance programs that ensure asset availability and maximize productivity. Azima DLI is based in Woburn, MA, with offices across the U.S. and international representation in Asia-Pacific, Central America, Europe and South America.

## Reliability as a Service™ (RaaS™)

Reliability as a Service (RaaS) is a sophisticated collection of integrated professional services to provide a clear competitive advantage to industrial plants and enterprises. Through its depth, virtualization and automation, RaaS from Azima DLI delivers a highly effective condition-monitoring service that supports maximum plant availability, without the capital expense of purchasing data-collection equipment, computer hardware, software or incurring support costs, including those for initial or ongoing training, power or IT internal/external support. RaaS is implemented for you with Azima DLI's WATCHMAN™ brand of integrated machine condition-monitoring solutions and unmatched industrial-machine expertise.
